Submit a Std.678 State Application and Resume to:

State Controller's Office  
Information Systems Division  
ATTN: Nedra Bryan – Ref#08-205  
300 Capitol Mall, 7<sup>th</sup> Floor  
Sacramento, CA 95814

**Scope of the Position:** Under the general supervision of a Data Processing Manager II, Web Development Services (WDS) unit, the incumbent will act as a project lead directing the design, programming, development and implementation of interactive Web applications for the State Controller's (SCO) Public and Internal Web sites. The incumbent will perform complex technical programming, implementing and maintaining the infrastructure of the Internet and Intranet Web sites in coordination with the Department of Technology Services (DTS). Specific duties include but will not be limited to the following:

**Duties and Responsibilities:** (Candidates must perform the following functions with or without reasonable accommodations).

- Act as project lead for the design, programming, development and implementation of interactive Web applications for the SCO Internet and Intranet Web sites. Collaborate with the application and business analysts to perform analysis and programming tasks on the more complex database systems development and maintenance projects.
  - Develop system, program and data requirements for the Local Government e-Claims (LGeC) System. Develop, program and implement web applications and provide programming to support the existing and future web applications. Define system, program and data requirements for all WDS unit supported applications including various technologies, languages and database systems. Develop alternatives and recommend preferred solutions to the identified requirements.
  - Define system, program and data requirements for all LGeC supported applications including various technologies, languages and database systems. Develop alternatives and recommend preferred solutions to the identified requirements. Provide programming expertise for the WDS unit in design, development, implementation and maintenance of programs using languages such as .NET, C#, VB.NET, ASP, ASP.NET, JavaScript, HTML, DHTML, CSS and XML to interface with Microsoft SQL Server databases. Develop design specifications for Web applications, which address the business and technical impact of the project's technical components in terms of interoperability, security, and dependability.
  - Serve as lead providing project training to technical and business analysts. Implement LGeC systems and resolve the more advanced complex system and production problems. Deploy SCO's LGeC application in a web-based, object-oriented, highly secure external infrastructure. Define functional, operational and data requirements for critical system changes. Develop and provide recommendations concerning changes in priorities, project scopes and schedules. Report progress on projects and activities in meetings and provide monthly written reports. Provide technical expertise, direction and assistance to the members of the project team. Provide direction concerning changes in priorities, project scope and schedule. Report progress on projects and related activities in meetings and monthly written reports. Collaborate with the SCO Executive Office, management, staff, business clients, external stakeholders, and vendors regarding technical issues.
- Duties will commensurate with level hired.**
